

The mk1 rigid raider is a proven vessel with capabilities second to none for its size, constructed from glass reinforced plastic the vessel is robust enough to take on the rigours of the construction industry. The large deck space allows for the transportation of tools, stores, equipment, and personnel. The 4-point lifting on the vessel means that it can be transported to sites where other vessels could not reach, also being road transportable she can be transported to anywhere in the UK.

General Characteristics
